- Friday 16th December - Last day of term (Early closure - 1:00 p.m.)
- Wednesday 4th January – All pupils return 8:35 a.m.

Recent News

Remembrance Day

To mark remembrance day, our students led a poignant whole school assembly. A two minute silence was observed by all on Friday morning and Mr Huntley and our head students attended the remembrance event in Bermondsey at the West Lane memorial.

Thinking About Careers

Year 11 have been thinking about their career aspirations. Every student has met with the career guidance councillor to discuss their future plans. These sessions have been so helpful, with many students now really clear on the pathway to their success!

Greenhouse Glory!

It was a fantastic day for Compass as we performed so well in what was a first competition for many of our students. Exceptional performances from both teams: the year 8 team won 2/3 matches, 9-0 wins twice and an 8-1 loss against a very experienced team. Our older team won all of their matches 6-3, 7-2 and 8-1!

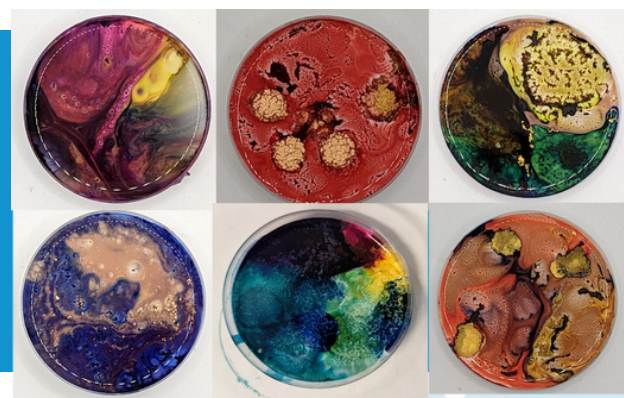

The Lord Mayor's show

Compass students were invited by the Master Pewterer, Wendy Joseph KC, to enjoy the Lord Mayor's Show on Saturday 12th November, followed by a delightful sit-down lunch at the splendid Pewterers' Hall. The show dates back to the early 13th century, when a desperate King John allowed the City of London to appoint its own Mayor. The King insisted that each newly-elected Mayor should come to Westminster and swear loyalty to the Crown, and the Mayor of London has been making that journey for over 800 years.

Positive Potential

Another fantastic fortnight of positives awarded, a total of 23,824! . Year 7 were again our highest scoring year group with 6,756 positives awarded. Our top 3 scoring Learning families were 7BMA 7WSE and 9GAH. Remember each student receives 5 positives for 100% weekly attendance! Let's see if we can reach over 30,000 positives in the next fortnight!

Collaborative curriculum

Science and Art combined to create some stunning pieces of work. Students in year 8 art classes completed a series of experiments with media in order to understand different properties. Students had to hypothesize before each experiment and reflect on the results. Some amazing outcomes, well done year 8!

First Give Recognition

Every year, we run a social action projects to raise money for charities and our local communities. Pupils have sold ice creams, cakes and sponged teachers, all in the name of good causes!

We were recognised for all our hard work with this certificate. £5000 is an incredible achievement – a huge well done to all involved.

Working lunches

We have introduced working lunches to give students the opportunity to speak to a range of professionals. The first of these saw many students attend to meet a pilot! They found out what it is like to fly an aeroplane, how to become a pilot and had the opportunity to ask questions. Our next working lunch is with economist, Bridget Rosewell OBE.
